

/ mod•si / (noun)

Just another modern business card? Might be the last business card you'll ever need.

Sustainability.

7,000,000,000

litres of water is used to make the business cards
Australians use each year.

88%

of those cards are in the bin within 7 days of
being given out.

It's time to act.

Technology.

No apps.
No software.
No downloads.

Tech the way it's meant to be.

Innovation.

Only 8% of business cards handed out are saved into anyones contact list.

We're dramatically improving that for the likes of Property Council Australia, Department of Tourism & Sport, U&U, Ulton, The City of Ipswich, and many more!

Sustainability

Technology

Innovation

Local

Local.

Locally made technology, data storage, printing and, most importantly, jobs for the locals.

Our QLD based team collaborate in our office over at Eight Mile Plains, Brisbane.

We're just one of the almost half a million Queensland small businesses doing great things!

These are just a few reason's why council's love us!

Digital Card.

Digital Wallets are the perfect solution
for an easy and slick networking tool

No wait on printing.
No misplacement.
No hassle.

331L

of water saved per

Physical Card.

One card to do it all

No restocking.

No paper waste.

No worries.

272L

of water saved per

Digital Duo.

The best of both worlds

Impress your peers with
a dazzling dynamic duo.

409L
of water saved per

Introducing One Access

\$215 annually

We understand the power of data and the importance of brand consistency. That's why we created the MODC One Access.

With One Access, an organisation can nominate team member/s with enterprise controls to ensure access, branding and consistency is maintained. One Access ensures that when teams change, details change, branding changes, easy and efficient updating and managing can occur. All is possible through your One dashboard combined with data extraction and analytics, performance insights and support connect.

Some of the legends who have made the switch to us.

Together we've saved 20.41M* litres of water

*As of January 2025
